ENCORE STEEL BUILDINGS

A Trusted Nationwide Provider of Metal Buildings and Components

Who We Are.

Encore Steel Buildings is a trusted nationwide provider of metal buildings and components.

We sell buildings designed for YOU using some of the most experienced engineers and design professionals in the business. Then we back it up with industry leading warranties.

Why Buy From Us?

Our buildings are designed by some of the best engineering professionals in the world.

We use only the most sophisticated, computer-aided manufacturing equipment available.

All buildings are produced in IAS certified manufacturing facilities.

Our bolt-together buildings require less labor and will save you time and money.

We have a solid relationship with suppliers ensuring your project stays on schedule.

Our dedicated support staff will be with you before, during and after your metal building purchase.

Flexible metal building design, professional engineering, industry-leading warranty protection, over 30 years of experience, and 100% American steel make Encore your number one choice for components and pre-engineered steel buildings.

NO MIDDLEMAN: Our all-steel metal buildings are designed and sold direct to you, so you save time and money and get the best price up front for your building project. Call us toll free at 1-866-614-9153 with any questions.

**"Our Warranties
are some of the
best in the
business"**

Every Encore Steel building
is backed with industry
leading warranties!

- 25-year warranty on all
AZ 55 Galvalume roof
panels
- Up to a 40-year warranty
on painted roof and wall
panels
- 50-year warranty on
structural frames

PBR Roof Panels - Our 26 gauge purlin bearing leg panels are far stronger than the commonly used “R” roof panels. These panels have an extended overlap to provide a leak-proof seal. PBR roof panels come standard on all Encore buildings.

Primary Framing - Steel Frame I-Beam Construction - Red oxide primer is applied on main frames to protect against corrosion.

Secondary Framing - 12-16 Gauge Cold Rolled Steel Members - Available in galvanized or red oxide primed - girts, purlins, and eave struts are factory pre-punched for ease of assembly.

Bracing - Steel reinforced cable bracing is supplied with all our buildings, except for special openings that may require portal framing. Steel cable bracing makes Encore buildings solid even in the most extreme weather conditions.

Self-Drilling Fasteners - Engineered for rapid drilling, self-drilling fasteners with neoprene washers provide a tight seal and minimize surface damage during installation.

Industry Leading Paint Finishes - Encore buildings are precision coated with only the highest grade finishes. Choose from a wide range of panel and trim colors.

Additional Standard Building Features - Encore buildings include trim, closures, ridge caps, structural bolts and more. We provide professionally detailed anchor bolt and stamped engineered drawings.

Optional Features -

Overhead/Sliding Doors - Encore standard overhead doors ship complete with all installation hardware and a manufacturer's warranty. Roll-up, bi-fold, and sliding doors are also available.

Horizontal Sliding Windows - Aluminum horizontal sliding windows are virtually maintenance free and come in various sizes. Each window includes a latch, half screen and weather stripping with either insulated or non-insulated glass.

Insulation - Encore offers three options -

- Vapor-lock composition consisting of polyethylene air bubble pockets sandwiched between thick layers of reflective coating;
- WMP-VR - This traditional vinyl back fiberglass insulation comes in a range of “R” values; and
- Premium Insulation System - Designed to fit snug between purlins to remain compression-free, this insulation gives a finished look while providing a high “R” value.

Optional Accessories - Many building enhancements are available such as wall louvers, reinforced translucent skylights, ridge ventilators, stall systems, and snow guards.
